-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 7-11-03.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: claim 13, 100-0% tungsten powder and 0-100% iron powder, claim 14, specific gravity less than 9, claim 15, shore D hardness of 58 or more.

Note: If the subject matter is added to the specification the case will no longer be a continuation, the case will be a CIP and a new declaration will be required in response to this action. If the specification as currently written supports the above limitations applicant is required to provide page and line numbers for the location.

The disclosure is objected to because of the following informalities: update the related application section. The status of each application should be included, i.e., abandoned. If the application is now a patent the patent number should be included.

Appropriate correction is required.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11

Art Unit: 3711

F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-24 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-47, 1-48, 1-47, and 26-47 of U.S. Patent No. 6,612,941, 6,431,999, 6,616,551, and 6,458,047, respectively. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the four patents above claim identical subject matter. The claimed golf balls include a dual core comprising a high density powdered metal and a first matrix material in the center core. The outer core layer has a lower specific gravity and is made from thermosets, thermoplastics, or combinations thereof. The golf also includes a dual cover layer. The present invention is obvious over the patents because the property ranges overlap the claimed properties of the present invention. One of ordinary skill in the art would have varied the ranges to achieve optimal performance.
